

VisiFlex product brief

VisiFlex is the ideal solution to many channel and concealed lighting applications. Flexible, low cost and very bright, it is easy to apply and so cool in operation that it needs no additional heat sinking.

VisiFlex is a 8mm wide flexible adhesive backed led strip with 60 LEDs per metre. The strip can be cut every 50mm (3 LED) allowing it to be placed precisely where needed and to be fitted around contours.

Available in White, Green, Red, Orange, Blue, Violet and Pink, VisiFlex also comes in an RGB variant with 100mm LED spacing.

Benefits of VisiFlex

- Flexible 8mm wide adhesive strip fits into/onto any profile.
- 50mm cuttable length means that LEDs are placed precisely where needed.
- Slim-line profile less than 3mm high, reducing unwanted visual impact.
- Very low heat generation, requiring no external heat sink and reducing constraints on design. (ventilation is required)
- Long life expectancy, 50,000hrs - 5 to 10 years of useful life.
- Low power consumption – 7 watt per metre.
- Very low operating costs achieved from zero maintenance and low power consumption.

Applications

- Channel lettering
- Backlighting
- Edge lighting
- Alcove lighting
- Feature highlighting
- Light boxes

Power

Input : 600 ma per m DC 12 volts
Output 150 Lumen/m 120 deg beam

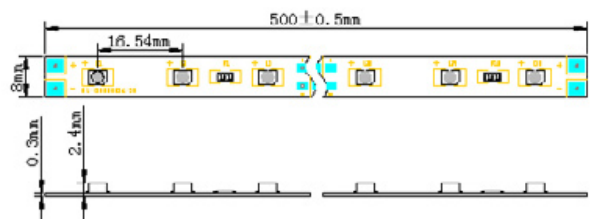

VisiFlex is powered from a small power supply and can be daisy chained or star wired as appropriate.

The RGB strip can be supplied with a range of colour management sequencing controllers

Finish

Available in reels of 5m, VisiFlex can also be supplied in pre-cut lengths with wire tails, plugs or terminations.
